

What's this? Sticky washers?  
**MONTIX**<sup>®</sup>  
self-adhesive washers

**Stick on – stay on**  
Save time and money

M3 to M12 washers always available and always to hand.  
Easy and fast – Peel off, stick on, stay on. Securely fixes  
the washer and its fastener in position.

**Montix<sup>®</sup>**

- Washers with adhesive
- Blue/silver galvanised steel, free of hexavalent chrome
- Solvent-free, odourless adhesive, temperature resistant  
up to 80° C

**Fields of application:**

Montix<sup>®</sup> is employed in all areas where rapid, reliable  
fixing is required. Where time means money and  
where work and production are performed on a  
sustained ecological basis.

In electrical jobs, Montix<sup>®</sup> prevents short  
circuiting. The washers stay put. Also, Montix<sup>®</sup>  
reinforces delicate printed circuit board screw  
connections.

In the trades, Montix<sup>®</sup> makes it easier to work  
overhead and enhances safety, as one hand is  
always free.

In conjunction with the fastener, Montix<sup>®</sup>  
quickly transforms any nut or screw into a  
complete nut or screw assembly.

In automotive work, attach Montix<sup>®</sup> washers in  
place before coating. Tighten up after coating.

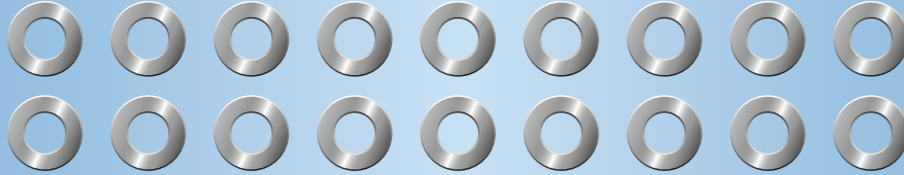

In sanitary installation work, Montix<sup>®</sup> also  
adheres to damp walls, locates and reinforces  
future drill points.

In boat building Montix<sup>®</sup> is used between the  
layers to mark and reinforce future drill points.

These are just a few of the applications where Montix<sup>®</sup>  
makes work easier, safer and cheaper.

**Size chart Montix<sup>®</sup> washers**

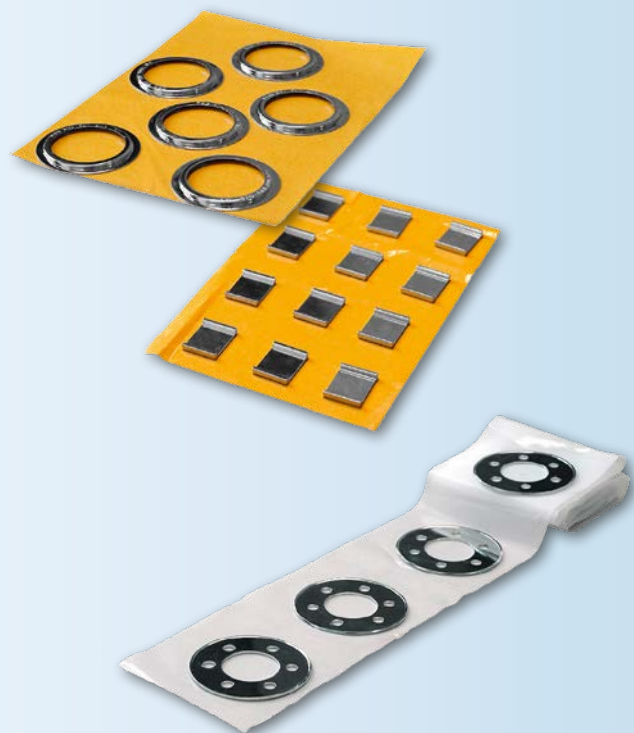

Size (nominal size)	Diameter of hole $D_1$	Outer diameter $D_2$	Thickness $s$	Material
M3	3.2 mm	7 mm	0.5 mm	Galvanised steel Bluish silver Free of Cr(VI)
M4	4.3 mm	9 mm	0.8 mm	
M5	5.3 mm	10 mm	1.0 mm	
M6	6.4 mm	12 mm	1.6 mm	
M8	8.4 mm	16 mm	1.6 mm	
M10	10.5 mm	20 mm	2.0 mm	
M12	13.0 mm	24 mm	2.5 mm	

**Special-purpose Montix<sup>®</sup> applications:**

We can produce Montix<sup>®</sup> on request in any appropriate materials and sizes and fitted with special adhesive (heat resistant up to 280 °C). Feel free to contact us!

Of course, we will be pleased to manufacture individually designed self-adhesive special components, such as blanked parts, eccentric disks, clips, thrust washers, special-purpose washers, spring, tensioning and toothed plate washers, fluted contact washers, drawn parts, punched parts, ribbed washers, special-purpose sleeves and pins etc.

**Montix<sup>®</sup> Adhesive**

Description:	
This glue is a modified, solvent-free acrylate adhesive. It has excellent tack and instantly adheres well to most surfaces including such difficult surfaces as foam and PE or PP film. The glue is free of APEOs.	
Technical specifications	
Backing material:	Nonwoven fabric, 12 g/m <sup>2</sup>
Cover:	Release paper, yellow, 90 g/m <sup>2</sup>
Glue application weight:	90 g/m <sup>2</sup>
Total thickness:	0.10 mm
Adhesive strength:	min. 16 N / 25 mm <sup>2</sup> (contact time: 1 hr)
Temperature resistance:	from -40°C to +100°C
